The Dynamics of Real Gases, 761

Internationale Bibliographie der Strömungstechnik 1959–1962, 762

Linearized Analysis of One-Dimensional Magnetohydrodynamic Flows, 762

Dynamics of Charged Particles, 763

Field-Coupled Surface Waves, 764

Elastic Liquids, 764

CONTENTS TO VOLUME 21

Part 1 January 1965

Report on the I.U.T.A.M. symposium on concentrated vortex motions in fluids. D. Küchemann *page* 1

Mass flow through a circular orifice and a two-dimensional slit at high Knudsen numbers. D. Roger Willis 21

On backward boundary layers and flow in converging passages. Sydney Goldstein 33

The viscous incompressible flow inside a cone. Robert C. Ackerberg 47

Horizontal mixing in the sea due to a shearing current. K. F. Bowden 83

Puff motions in unstratified surroundings. J. M. Richards 97

Corrigendum: Measurements of the fluctuating pressure at the wall beneath a thick turbulent boundary layer. W. W. Willmarth 107

Observations of oscillatory motion in certain swirling flows. Robert C. Chanaud 111

The instability of inviscid jets and wakes in compressible fluid. M. Lessen, J. A. Fox and H. M. Zien 129

On the behaviour of small disturbances to Poiseuille flow in a circular pipe. A. E. Gill 145

On the flow of an elastico-viscous liquid in a curved pipe of elliptic cross-section under a pressure-gradient. R. H. Thomas and K. Walters 173

One-dimensional compression of a collisionless gas. G. A. Bird 183

Part 2 February 1965

The evolution of trans-Alfvénic shocks in gases of finite electrical conductivity. L. Todd 193

A three-dimensional model of inertial currents in a variable-density ocean. A. R. Robinson 211

The stability of an asymmetric zonal current in the atmosphere. Frank B. Lipps 225

Investigation of the flow behind a two-dimensional model with a blunt trailing edge and fitted with splitter plates. P. W. Bearman 241

A non-linear theory for symmetric, supercavitating flow in a gravity field. Charles W. Lenau and Robert L. Street 257

Ignition and extinction in combustion of initially unmixed reactants. Francis E. Fendell 281

Resonant interactions among capillary-gravity waves. Lawrence F. McGoldrick 305

Note on the instability of a non-uniform vortex sheet. L. M. Hocking *page* 333

Incompressible viscous flow past a semi-infinite flat plate. J. D. Murray 337

The structure of non-linear cellular solutions to the Boussinesq equations. Lee A. Segel 345

The non-linear interaction of a finite number of disturbances to a layer of fluid heated from below. Lee A. Segel 359

Part 3 March 1965

Transition in circular Couette flow. Donald Coles 385

On the harmonic oscillations of a rigid body on a free surface. W. D. Kim 427

Laminar convection in a heated vertical tube rotating about a parallel axis. W. D. Morris 453

On the mathematics of fluidization. Part 1. Fundamental equations and wave propagation. J. D. Murray 465

Determination of the sonic line in hypersonic flow past a blunt body. M. I. G. Bloor 495

A mechanism for instability of plane Couette flow and of Poiseuille flow in a pipe. A. E. Gill 503

Vorticity amplification in stagnation-point flow and its effect on heat transfer. S. P. Sutera 513

A free-streamline solution for stratified flow into a line sink. Timothy W. Kao 535

The dispersion and attenuation of helicon waves in a uniform cylindrical plasma. J. P. Klozenberg, B. McNamara and P. C. Thonemann 545

The instability of a fluid layer with time-dependent heating. Wilbert Lick 565

Part 4 April 1965

Magnetohydrodynamic flow in rectangular ducts. J. C. R. Hunt 577

Shock waves in a gas with several relaxing internal energy modes. John F. Clarke and J. B. Rodgers 591

A computational method for viscous flow problems. Carl E. Pearson 611

Numerical solutions for the time-dependent viscous flow between two rotating coaxial disks. Carl E. Pearson 623

Stability of spiral flow between concentric circular cylinders at low axial Reynolds number. Subhendu K. Datta 635

The Mach wave field radiated by supersonic turbulent shear flows. J. E. Ffowcs Williams and G. Maidanik 641

Theory of heat transfer to a shock-tube end-wall from an ionized monatomic gas. James A. Fay and Nelson H. Kemp 659

Thermal conductivity of argon at high temperatures. MORTON CAMAC and ROBERT M. FEINBERG *page* 673

Similarity laws for turbulent boundary layers with suction or injection. H. TENNEKES 689

Space-charge waves carried by a plasma trapped in a potential well. F. D. KAHN 705

Electrokinetic flow round an elliptic cylinder in a finite fluid. R. CADE and ALTHEA ROWE 723

The steady separated flow past a circular cylinder at large Reynolds numbers. ANDREAS ACRIVOS, D. D. SNOWDEN, A. S. GROVE and E. E. PETERSEN 737
